

## Statement Regarding California Prop 65

27<sup>th</sup> June 2019

To whom it may concern,

IQD Frequency Products Ltd is aligning with the California Prop 65 law. This law includes a list of more than 900 chemicals known to cause cancer or reproductive harm by significant exposure. Prop 65 does not ban the use of chemicals on the list but requires product warning labels that help Californians from products they use. For general information, please check OEHHA website.

The basic premise of the law is the following;

“No person in the course of doing business shall knowingly discharge or release a chemical known to the state to cause cancer or reproductive toxicity into water or onto land where such chemical passes or probably will pass into any source of drinking water...” (CA Health & Safety Code, Section 25249.5)

“No person in the course of doing business shall knowingly and intentionally expose any individual to a chemical known to the state to cause cancer or reproductive toxicity without first giving a clear and reasonable warning...” (CA Health & Safety Code, Section 25249.6)

Once a chemical is listed, businesses are required to;

Provide a “clear and reasonable” warning before knowingly and intentionally exposing anyone to a listed chemical. This warning can be given by a variety of means, such as by labelling a consumer product, posting signs or distributing notices.”

The warnings are only required if it can be determined that there is ‘significant risk’ of exposure.

After analyzing our products we are aware that they can contain some of the Prop 65 chemicals listed. Looking at the use of our products and the way in which they are exposed to the public we do not think there can be any ‘significant’ risks associated.

However, we do think it’s best to provide information to our customers of the presence of these chemicals via our certificates of conformance. Therefore, we are in the process of adapting our Certificates of Conformity to include the following warning statement;

**WARNING: This product can expose you to chemicals including Nickel, which is known to the State of California to cause cancer. For more information go to [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov)**
