

Product Manager (Electronics)

About us:

IQD has been a recognised market leader in the frequency control market since 1973 and is part of the Würth Elektronik eiSos group, one of the leading European manufacturers of passive components. With active customers in over 80 countries, IQD offers one of the most comprehensive frequency product ranges available, from low cost commercial grade product to that used in high reliability industrial and automotive applications.

We are a team of hardworking and passionate people, and you'll join the business during a time of exciting rapid growth, with plenty of encouragement and opportunities for career development within many areas of the business.

What to expect:

You will project manage changes to the product line up offered at IQD, and also you will take an active lead in projects for frequency control products within Würth Elektronik eiSos

This is a new role for IQD, born from the growth of the company and our integration into our parent company Würth Elektronik eiSos. We need your help to adapt the processes from our parent company to be relevant to ourselves, to align our ways of working and retain the dynamics of our company.

You will need to collate information from many different departments and present this to the stakeholders. You'll need to document every step and keep progress records up to date.

You'll bring your keenness to learn, your efficiency in documentation and your strengths in group working. You'll learn about electronics components, their production design cycle and applications.

What we expect:

- Project management experience: You will be working with multiply teams on multiple projects
- Knowledge of electronics: You don't need to be an electronics engineer but any knowledge you have will be very useful.
- IT savvy and confidence learning software packages.
- Strong documentation and communication skills, both written and verbal. You'll be keeping notes on projects and presenting in meetings.

Sounds interesting?

Send us your CV and a covering letter telling us why you are the best candidate for this role. All applications for this vacancy are to be submitted to the email address below, and strictly no agency calls or agency CV submissions.

We look forward to receiving your application at IQDHR@iqdfrequencyproducts.com
