

Technical Database Engineer

About us:

IQD has been a recognised market leader in the frequency control market since 1973 and is part of the Würth Elektronik eiSos group, one of the leading European manufacturers of passive components. With active customers in over 80 countries, IQD offers one of the most comprehensive frequency product ranges available, from low cost commercial grade product to that used in high reliability industrial and automotive applications.

We are a team of hardworking and passionate people, and you'll join the business during a time of exciting rapid growth, with plenty of encouragement and opportunities for career development within many areas of the business.

What to expect:

As a Technical Database Engineer, you will join a highly experienced team of Application Support engineers based at our Crewkerne (Somerset) office. Between them is over 100 years of electronic knowledge. Their role is to support customers with their technical enquiries. Your role will be to support the Application Team with the database of parts and data sheets, keeping it aligned with developments in the product range.

You'll bring your keenness to learn. You will develop an understanding of large database management, Product Information Management systems. You'll learn about electronic design cycles in multinational electronics industries.

What we expect:

- Some basic knowledge of electronics
- Experience of working with databases
- IT savvy, and confident learning software packages such as, 3DCAD, Database management and CRM tools
- Excellent attention to detail and strong communication skills, both written and verbal
- Although not essential, experience gained providing technical customer support would be advantageous, as would the ability to converse in a second language such as German.

Sounds interesting?

Send us your CV and a covering letter telling us why you are the best candidate for this role. All applications for this vacancy are to be submitted to the email address below, and strictly no agency calls or agency CV submissions.

We look forward to receiving your application at IQDHR@iqdfrequencyproducts.com

What we offer:

A permanent contract, working 35 hours per week,

A competitive salary, level dependent on experience and qualifications

Excellent career development opportunities
