

ISSUE 1; January 2021

Description

- A low noise and low power OCVCSO (Oven Controlled, Voltage controlled, SAW Oscillator) at 1200MHz, powered by a low voltage 5V power supply. The 1200MHz signal is generated from a 600MHz fundamental frequency, followed by a low noise frequency doubler. It is designed for lab environment (test equipment, shelter, ground based military equipment). Manufactured for us by Rakon.
